

Spinal Care Bedding Co.
For the Best Sleep Ever

QUANTUM™ NARROW-DIAMETER COIL

FINE WIRE OPENS THE DOOR TO NEW LEVELS OF BEDDING COMFORT.

Leggett & Platt's **Comfort Core** line of fabric-encased innersprings adds a fine wire option to its lineup: **Quantum™**. Born of recent developments in the engineering and shaping of fine wire, Quantum introduces a new level of bedding comfort by utilizing more "working wire" and an unprecedented coil count.

- **Revolutionary**, narrow-diameter coil system – the latest and greatest in sleep technology.
- **Can be combined** with the spring geometry of premium systems, creating unique, proprietary options.
- **More working wire** flexes, responds, and supports all body types, weights, and shapes.

Spinal Care™ 1530 Support

- **Nearly 200% more coils*** Finer wire means more coils, which means more surface coverage and even better conforming support.
- **Innersprings sleep up to 28% cooler** than foam, according to research conducted by Kansas State University and the Institute of Environmental Research.

ACTIVE SUPPORT TECHNOLOGY®

The **Active Support Technology®** of innersprings relaxes your muscles during natural sleep movements, comforting and supporting your body during a good night's rest.

*1575 compared to 540 in an entry-level foam-encased Queen.
