INNERSPRING

Spinal Care 357 Support

We're more excited than ever about **VertiCoil Edge**, our remarkable new innerspring. You will be too when you learn more about why it's a better value than the ordinary industry standard. VertiCoil Edge is a remarkable innerspring offering a wealth of sleep benefits, including more consistent support anywhere on the mattress.

Three big reasons why VertiCoil® Edge™ is better than the industry standard.

1. Improved perimeter consistency

VertiCoil Edge offers consistent support around the entire perimeter. Now you can rest comfortably anywhere on your new mattress – even the edge.

2. 21% more coils*

VertiCoil Edge has a higher count than the industry standard. A higher count means more support for your body and that's something you can rest on!

3. You get MORE surface coverage

That means more body support and a better night's sleep compared to industry standard units. Take a good look at our unique VertiCoil Edge spring.

ACTIVE SUPPORT TECHNOLOGY®

The **Active Support Technology®** of innersprings relaxes your muscles during natural sleep movements, comforting and supporting your body during a good night's rest.
